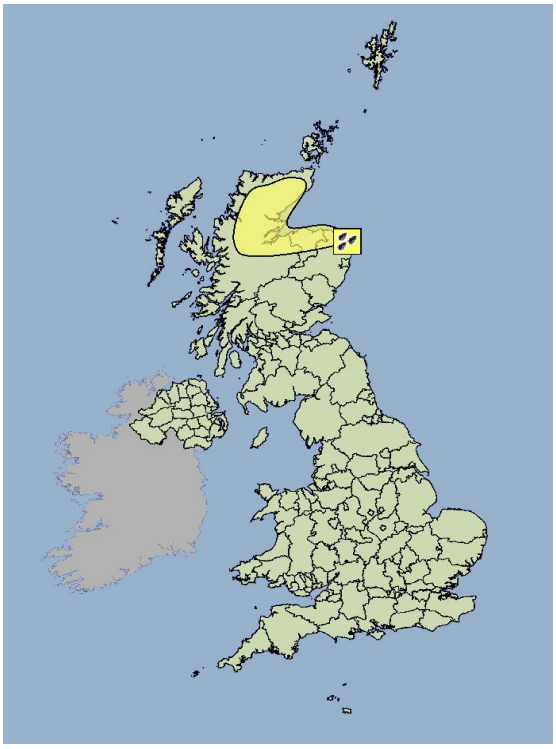
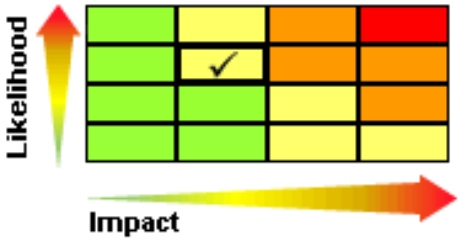
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure will drift eastwards into western Scotland later today, with bands of rain, locally heavy, within its circulation. Ahead of this, showers are expected to break out, becoming heavy and possibly prolonged in places across more northern parts of Scotland this afternoon and into the evening. A few locations could see as much as 20 mm of rain within an hour and 40 mm within 3 hours.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **14:00 on Wed, 03rd Aug 2016** until **21:00 on Wed, 03rd Aug 2016**

Showers will affect northern Scotland this afternoon, where some of these may become heavy and slow moving with a risk of some torrential downpours. Not everywhere in the warning area will see the heaviest of the rain with some places remaining dry. Showers will ease later this evening.

Please be aware that some low level disruption may occur due to localised flooding.
